Summary

Computer Science (Data Science) second-year student at SRM Institute of Science and Technology, currently interning as a Software Engineer at Namo Labs and a Full Stack Developer at SpazorLabs. Experienced in building and shipping full-stack web applications across financial analytics, public health, and AI governance using React, Next.js, Node.js, TypeScript, and PostgreSQL, with practical exposure to Generative AI workflows including LLM APIs and RAG pipelines. Recognized with 1st Place at CAD 4.0 and ATARAXIA 2.0 Ideathon, and 2nd Place at Foundathon 3.0.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, HTML5

Frontend & Backend Frameworks: React, Next.js, Node.js, FastAPI, Express.js, REST API Design, WebSockets

Generative AI & LLM: LLM APIs, RAG Pipelines, Vector Databases, AI Agents & Automation, Prompt Engineering

Databases & Cloud: PostgreSQL, MongoDB, Supabase, AWS (S3, EC2), Vercel, Cloud Storage APIs

Tools & Practices: Git & GitHub, Postman, Authentication Systems (JWT / OAuth), Agile Development, CI/CD

Experience

Namo Labs, Software Engineer Intern

Chennai, TN (Remote)

- Developing web applications and user interfaces using React.js and TypeScript.

May 2026 – Present

SpazorLabs, Full Stack Developer Intern

Chennai, TN (On-site)

- Building and shipping full-stack products at a fast-paced startup using TypeScript and React.js.
- Focused on writing clean code, solving real problems, and delivering work that actually reaches users.

Apr 2026 – Present

Projects

DEVISE — AI Financial Analytics ([devise-beryl.vercel.app](#))

Jan 2026

Python · React · TypeScript · PostgreSQL · scikit-learn

- Developed an AI-driven stock analysis tool that evaluates market trends to generate stock signals.
- Built a responsive full-stack dashboard featuring real-time portfolio tracking and broker API integration.

Sanjeevani — Community Health Surveillance ([sanjeevani-gold.vercel.app](#))

Mar 2026

Next.js · Node.js · PostgreSQL · Python · scikit-learn · Leaflet

- Created a predictive health surveillance platform that analyzes water quality data to forecast disease risks.
- Built role-based interactive dashboards featuring localized outbreak alerts and an AI health assistant.

Sentrix — AI Governance Dashboard ([devise-v1.vercel.app](#))

Feb 2026

React · TypeScript · Python · Supabase

- Developed a governance platform and desktop agent to monitor AI tool usage and network activity across an organization.
- Implemented secure access control and real-time live session tracking for organizational monitoring.

Education

SRM Institute of Science and Technology, Kattankulathur

Chennai, Tamil Nadu

B.Tech in Computer Science & Engineering (Data Science)

Aug 2024 – Aug 2028

- CGPA: 8.8 / 10 | Coursework: DSA, OOP, Database Systems, OS, Computer Networks

Achievements

- **1st Place** — CAD 4.0 Hackathon (for Sentrix), Coding Ninjas 10X Club, SRM Institute (Apr 2026)
- **1st Place** — Wolf of Cherry Street, ATARAXIA 2.0 Ideathon, Cherry+ Network, SRM Institute (Feb 2026)
- **2nd Place** — Foundathon 3.0, Founders Club, SRM Institute of Science and Technology (Mar 2026)

Certifications

- Data Structures & Algorithms with Java | Apna College | 2025
- AWS Cloud Practitioner Essentials | Amazon Web Services | 2025
- OCI Data Science Professional | Oracle | 2025
- AI Safety & Alignment Fundamentals | Anthropic Academy | 2026
